School Program

# DPV Health Respectful Relationships Support for Secondary Schools

The DPV Health Gender Equity and Prevention of Gender-Based Violence Team supports primary and secondary schools across Hume and Whittlesea to plan, implement, and evaluate their whole-school approach to the Victorian Government's Respectful Relationships (RR) initiative.

## How we can support you:

### RR Audit and Action Plan

Our team can support you to complete your RR audit and develop your action plan, review these documents, and provide feedback as a critical friend.

### School Community Engagement

Our team can help you to raise awareness and understanding of RR within your school community. For example, through parent information sessions, newsletter articles, and engaging and consulting your community on RR initiatives.

### Student Voice and Agency

Our team can work with your school to support the planning and implementation of student-led RR initiatives.

### Review and Development of School Policies

Our team can support the development of new policies and review of existing policies to align with the RR whole-school approach. For example, Student Wellbeing and Engagement and Diversity and Inclusion policies.

### Presentations and Training

Our team can deliver tailored training and presentations to your staff, students, and families on RR, gender equity, and prevention of gender-based violence related topics.

### Resources and Promotional Materials

Our team can provide your school with a range of resources and promotional material to support RR curriculum implementation and embedding of RR messages across your whole school. For example, RR banners and posters and gender equity and gender-based violence fact sheets.

### Curriculum Support

Our team can support your staff in the delivery of the RR curriculum by sharing strategies and activities that are fun, engaging, and effective.

### Other DPV Health Services

Our team can link you with other DPV Health services to support the needs of your staff, students, and broader school community. To find out more, visit: [www.dpvhealth.org.au](http://www.dpvhealth.org.au)
