

Supporting your Child's Health & Wellbeing

Children's Services

DPV Health offer an extensive range of specialised services for children's health. We use a family-centred approach to offer quality, evidence-based interventions and strategies to maintain and improve the health, development and wellbeing of your child.

We offer a variety of groups to support your child's health:

Social Sprites

This neurodiversity-affirming group has been designed for autistic girls and those on the journey to diagnosis. The group uses a supportive and strengths-based approach to helping participants develop an understanding of self and to tune into others within a safe and fun environment.

Swim Skills Group

This group involves water therapy and aims to help children learn and develop fine and gross motor skills in a social setting. It will assist in building a child's strength and balance while incorporating social communication skills through meaningful interactions and dialogue.

Skills For Learning & Play

This group aims at supporting children to be kinder/school ready by assisting them in improving their communication, social, cognitive, motor and resilience skills through meaningful interactions and dialogue. They will develop the skills necessary to get along with others, work together in a team, follow verbal instructions and most of all, have fun!

Several groups will be available across our sites throughout 2024 including Lego Therapy Group, We Like to Move It group.
