Acupuncture Treatment at Mill Park

Acupuncture has been used in Traditional Chinese Medicine (TCM) for thousands of years. During the treatment very fine needles are inserted into specific points on the body/scalp/ears, to restore balance and encourage the body to heal itself. For people who don't want needles or for medical reasons, very low level Laser can be used to the acupuncture points.

In the past decades, Acupuncture has gained wide acceptance in western Countries. There is increasing scientific evidence to support the effectiveness of acupuncture for the cure of many conditions.

What are conditions can be treated with acupuncture?

- Neurological conditions: Parkinson disease, post Stroke, migraine.
- Anxiety/depressing/insomnia/fatigue.
- Gynecological conditions: symptoms of menopause such as hot flush.
